Laboratories

Pharmaceutics

Pharmaceutics is one of the disciplines in the pharmacy which deals with formulation of a pure drug substance into dosage forms. The subject areas of pharmaceutics include Pharmaceutical Technology, Physical Pharmaceutics, Pharmacokinetics & Biopharmaceutics, Industrial Pharmacy and Drug Delivery Systems for professional doctoral degree, graduate and undergraduate students.

Pharmaceutical Chemistry

Pharmaceutical chemistry is the study of drugs, and it involves drug development. This is a multi-disciplinary field of study that utilizes synthetic organic chemistry in conjunction with developments in biochemistry, computational chemistry, molecular biology and pharmacology to advance drug discovery.

Pharmacognosy

Pharmacognosy is a branch of Pharmaceutical sciences which deals with study of drugs obtained from natural sources. The goal of the branch is to impart the knowledge to the students in the field of Pharmacognosy, phytochemistry and biotechnology so as to meet the industrial, research and academic standards.

Pharmacology

This in-person laboratory course is the first half of the laboratory component generally required for a fundamental first-year anatomy and physiology course. This course provides an introduction to the structure and function of the human body. It begins with an orientation to the body and then covers the functions of a generalized cell- the atoms organs, organ systems as well as the integumentary, skeletal, muscular and nervous systems.
